

PANORAMIC trial

Have you just tested positive for Covid-19? Would you like to join a new UK-wide trial for effective early treatments?

This trial is available for people who are at wider risk of serious illness from Covid-19 either because:

- They are over the age of 50, or
- They are aged 18 to 49 with underlying health conditions. (Many will already qualify for free annual flu jabs.)

To take part people need to fall into one of the at-risk groups, have tested positive for Covid-19 by either a PCR or LFT test, and have symptoms.

The [PANORAMIC](#) trial involves a course of oral tablets. These tablets are already used to treat some people who are ill enough with Covid-19 to be in hospital. The trial is now looking at how effective the treatment is for people who are still **at home** who test positive for Covid-19, and who have symptoms.

It is a UK-wide study and anyone who is in the at-risk categories can apply to take part, whether they have been vaccinated or not. More details, including a link to apply online, are available on the PANORAMIC website www.panoramictrial.org. Or, ring 08081 560017 (calls are free.)

Once accepted onto the trial, the tablets are posted to you straight away as they should be taken within five days. You will be asked to answer follow up questions online or by telephone, but no face-to-face visits are needed.
